## EXPERIENCE

### athenahealth | Healthcare IT

Software Developer

2017 - PRESENT

- Develop widgets using React and Less to display patient information.
- Created design specifications, participated in design and code reviews.
- Worked on the design and initial development of a new platform to import medical documents.
- Developed a Kotlin micro-service to generate XML documents based on a government-compliant architecture (CCDA).

### General Motors | Cadillac.com Team

Web Developer

2015 - 2017

- Developed new components for the award-winning website Cadillac.com and its mobile version.
- Worked with stakeholders to refine and negotiate product requirement specifications, functional specifications, and product vision and direction.
- Designed a web component that reduced page load speed by over 15%, improving SEO and accessibility, and saving authoring expenses.
- Organized and participated in events representing GM at volunteering opportunities and competitions.

### MicroAssist | Information Technology and Services

PHP Developer

2014 - 2015

- Designed and developed different web projects with a focus on accessibility, including new features and website enhancements.
- Created and integrated an automated mail system with 3rd party APIs.
- Developed and collaborated in the translation project of the ITTD website for the Texas Department of Public Safety.

### Hewlett Packard | Content & Digital Asset Management

IT Engineer

2011 - 2014

- Developed two internal content management systems (related to HP's products documentation) with over three million monthly visitors.
- Coordinated efforts with an overseas team, applying Agile methodologies to ensure on-time, on-spec project delivery.
- Improved different batch jobs performance, reducing execution time by over 50%, and eliminating downtime.
